Malayalam
(Mother tongue)

WORK EXPERIENCE (6 YEARS)

02/2022 – 11/2024*	**Senior Software Fullstack Developer** *at Cognizant, India*
09/2018 - 02/2022	**Backend Developer** *at Tata Consultancy Services, India*

*available to join immediately.

EDUCATION

2014 - 2018	**Bachelor of Technology (Computer Science & Engineering)** *Federal Institute of Science and Technology, India*.

Thesis: *Emotion Analysis from Speech*
- Developed a system to analyze and identify emotions from a recorded piece of audio, using **Python** for audio processing and **SVM (Support Vector Machines)** for emotion classification
PROJECTS

12/2023 - 11/2024	**Prudential Eclient** Software skills: Java ,Kotlin ,Vue.js, Spring Framework, Hibernate,Kubernetes ,Gradle ,RESTful APIs, SQL, Git, Jira, Bitbucket,Gradle, AWS, Splunk, Swagger,JUnit

- **Fullstack Developer** *for the* **eClient system** *at* **Prudential Life Insurance***, a platform for creating and processing new insurance applications.*
- Developed and maintained the **backend services** using **Java** and the **Spring Framework**. *Frontend was developed using* **Vue.js***. Building* **RESTful APIs** *to manage data collection, storage, and integration with downstream systems for underwriting.*

12/2022 - 12/2023	**Lineage** Software skills: Java, ReactJS,AWS ECS, Postgres DB

- *Full Stack Developer* for *Lineage Logistics, a leading provider of temperature-controlled warehousing and logistics solutions. Contributed to the development of a* **logistics application** *that tracked various stages of parcel transportation.*
- *Backend development in* **Java** *,* **frontend development** *in* **ReactJS***, and* **database management** *with* **PostgreSQL** *to enhance system functionality and scalability.*

02/2022 - 12/2022

Agilent

Software skills: Java, AngularJS,AWS, Rest API, MySQL, Gradle ,DynamoDB, Git, Jira, Bitbucket, NPM, SonarQuobe, OKTA,Jitterbit.

- **Fullstack Developer** for **Agilent Technologies**, a leader in medical equipment manufacturing, contributing to the development of an **admin application** to manage access to Agilent's suite of applications.
- Implemented **backend services** using **Java** and **RESTful APIs**, enabling secure and efficient user management across applications. Frontend was developed using **AngularJS**

07/2020 - 02/2022

Locker Boost (IoT Developer)

Software skills: Nodejs, AWS, Rest API, PostgresDB, AWS IoT services , AWS Lambda, Git, Jira, Bitbucket, NPM, SonarQuobe, SQLite,Jest , Swagger.

- **Backend Developer** for an **application managing the parcel locker network**, focusing on optimizing locker operations such as reservation, configuration, and capacity management.
- Developed and maintained the **backend services** using **Node.js**, **PostgreSQL**, and **SQLite** for data storage, ensuring efficient and scalable operations.
- Implemented **RESTful APIs** to facilitate seamless integration with **bpost operational systems** and external services.
- Utilized **AWS IoT services** and **AWS Lambda** to process real-time data and automate locker operations.

09/2019 - 07/2020

Chatbot Solution(AI developer)

Software skills: Python, Rasa, LUIS, Microsoft Azure,Pydantic

- *Backend Developer* for Amway's Chatbot Solution, building an AI-powered IT support chatbot using **Python** and **Rasa** for NLU and dialogue management, integrating LUIS for advanced language understanding, ensuring data validation with Pydantic, developing automated tests with Pytest, and managing cloud deployments through Azure DevOps on **Microsoft Azure**.

09/2018 - 09/2019

RIA Money Transfer

Software skills: Java, AWS EC2, AWS IAM, AWS API gateway, Git, Jira, Bitbucket, NPM, SonarQuobe, Jest.

- **Backend Developer** *for an* **application developed for Belgium postal offices***, enabling essential money transfer functionalities, including* **currency conversion** *and* **send/receive money** *services.*
- *Built and maintained the* backend architecture *using Java, and frameworks like* Spring *to implement and optimize key modules.*
